JOSHUA G. DAMPIL

Muntinlupa City, PH • joshuadamps@gmail.com • +639924193461 • linkedin.com/in/joshua-dampil • joshdamp.github.io

SUMMARY

Fourth-year **Computer Science** student specializing in **Machine Learning** and **Computer Vision**, with experience in building **ML models**, **mobile/web applications**, and **automation tools**. Proven track record in hackathons and AI projects, delivering impactful, real-world solutions. Passionate about leveraging technology to solve complex problems and drive meaningful solutions

EXPERIENCE

Globe Telecom | *Entry Engineer Intern* | *BGC, Taguig* **June 2026 - Present**

- Served as Intern Lead and Solutions Architect, developing the Customer Experience Simulation & Validation monitoring platform and the Project Helio automated status page.

Ayala Group Summer Internship Program | *Strategist & Developer* | **June 2026 - Present**

- Served as a strategist and developer, contributing to digital transformation prototypes and strategic workflow assessments across business unit under ayala group.

SN Group | *AI Specialist Intern* | *Australia (Remote)* **November 2025 - February 2026**

- Architected a goal-driven **AI automation** ecosystem using **n8n** to manage **30+ clients**, replacing manual coach-client tracking with automated data capture.

Software Engineer | *Freelance* **2024 - Present**

- Developed custom **Machine Learning models** for classification and object detection, and built **cross-platform applications** across mobile, web, and gaming environments for a portfolio of **20+ clients**
- **Co-founded startup** in November 2024 providing programming solutions for students, developing tools to resolve coding challenges and enhance academic performance

PROJECTS

Kusho' — Smartwatch Air Writing Gesture Assistive System

- Developing a smartwatch-based system using hybrid deep learning to recognize air-writing gestures, assisting early learners in handwriting practice.

Clothera — Virtual Try-On App

- Developed a mobile app that uses ResNet50 and OpenCV to virtually fit accessories and clothes onto a user's body or face.

MindMap — AI Journaling Platform

- Created a mobile and web journaling app that uses NLP to analyze emotions and provide AI-generated mental wellness insights.

SKILLS

Technical: n8n, Python (Advanced), JavaScript/TypeScript, C#, SQL; TensorFlow, Scikit-learn, OpenCV, NumPy; React, React Native; HTML, CSS, REST APIs, FastAPI; Git, GCP, Docker
Soft Skills: Problem Solver, Critical Thinking, Patient, Collaboration, Teamwork

EDUCATION

Mapua Malayan Colleges Laguna **Cabuyao, Laguna**
BS in Computer Science Specialization in Machine Learning **August 2022 - November 2026**
- Consistent President's Lister

CERTIFICATIONS

Google Professional Data Analytics — Coursera **December 2025**
CompTIA Tech+ — Comptia **December 2025**

ACHIEVEMENTS

Finalist, Asean AI Hackathon **June 2026**

- Selected as a finalist out of over 240 regional teams across Southeast Asia, developing an AI-driven educational solution designed to improve learning access and engagement.

Champion, Byte Forward Hackathon (South Luzon) **September 2025**

- Secured first-place championship by developing a tourism and MSME-focused app within 24 hours, innovating solutions to real-world challenges and promoting local economic growth
