SUMMARY

Graduating Computer Science student specializing in **Machine Learning**, with experience across **solutions architecture**, **applied AI**, and **full-stack development**. **Multi-hackathon** finalist and champion with a track record of designing and delivering working systems under tight constraints. Focused on building technology that solves real problems at scale.

EXPERIENCE

Globe Telecom | Solutions Architect Intern | BGC, Taguig **June 2026 - Present**

- Built and deployed GStat, Globe's service status portal for **18** business services and **85** application service providers — live status, built to give customers a transparent view of service health on **AWS EKS** via **Helm** and **ArgoCD**, with ownership data from a Git-backed **Backstage** catalog.

Ayala Group Summer Internship Program | AI Engineer Intern | **June 2026 - July 2026**

- Constructed a **456-question benchmark** from 3 years of **P1/P2 incident** and root-cause records to evaluate **LLM agent triage accuracy** via Langfuse

SN Group | AI Specialist Intern | Australia (Remote) **November 2025 - February 2026**

- Architected a goal-driven **AI automation** ecosystem using **n8n** to manage **30+ clients**, replacing manual coach-client tracking with automated data capture.

Software Engineer | Freelance **2024 - Present**

- Developed custom **Machine Learning models** for classification and object detection, and built **cross-platform applications** across mobile, web, and gaming environments for a portfolio of **20+ clients**
- **Co-founded startup** in November 2024 providing programming solutions for students and small businesses, developing tools to resolve coding challenges and enhance academic performance

PROJECTS

Kusho' — Smartwatch Air Writing Gesture Assistive System

- Developing a smartwatch-based system using hybrid deep learning to recognize air-writing gestures, assisting early learners in handwriting practice.

Clothera — Virtual Try-On App

- Developed a mobile app that uses ResNet50 and OpenCV to virtually fit accessories and clothes onto a user's body or face.

MindMap — AI Journaling Platform

- Created a mobile and web journaling app that uses NLP to analyze emotions and provide AI-generated mental wellness insights.

SKILLS

Technical: n8n, Python, JavaScript/TypeScript, C#, SQL; TensorFlow, Scikit-learn, OpenCV, NumPy; React, React Native; HTML, CSS, REST APIs, FastAPI; Git, AWS, Docker

Soft Skills: Problem Solver, Critical Thinking, Patient, Collaboration, Teamwork

EDUCATION

Mapua Malayan Colleges Laguna **Cabuyao, Laguna**

BS in Computer Science Specialization in Machine Learning **August 2022 - August 2026**

- Magna Cum Laude | Consistent President's Lister

CERTIFICATIONS

Google Professional Data Analytics — Coursera **December 2025**

CompTIA Tech+ — Comptia **December 2025**

ACHIEVEMENTS

Finalist, Asean AI Hackathon (ASEAN - Vietnam) **August 2026**

- Selected as a finalist out of over **200+** regional teams across Southeast Asia, developing an AI-driven educational solution designed to improve learning access and engagement.

Champion, Byte Forward Hackathon (South Luzon) **September 2025**

- Ranked **1st in South Luzon** and **5th nationally**, developing an AI-powered tourism platform with **LLM voice interaction, translation, recommendations, and route planning** within 24 hours.
